

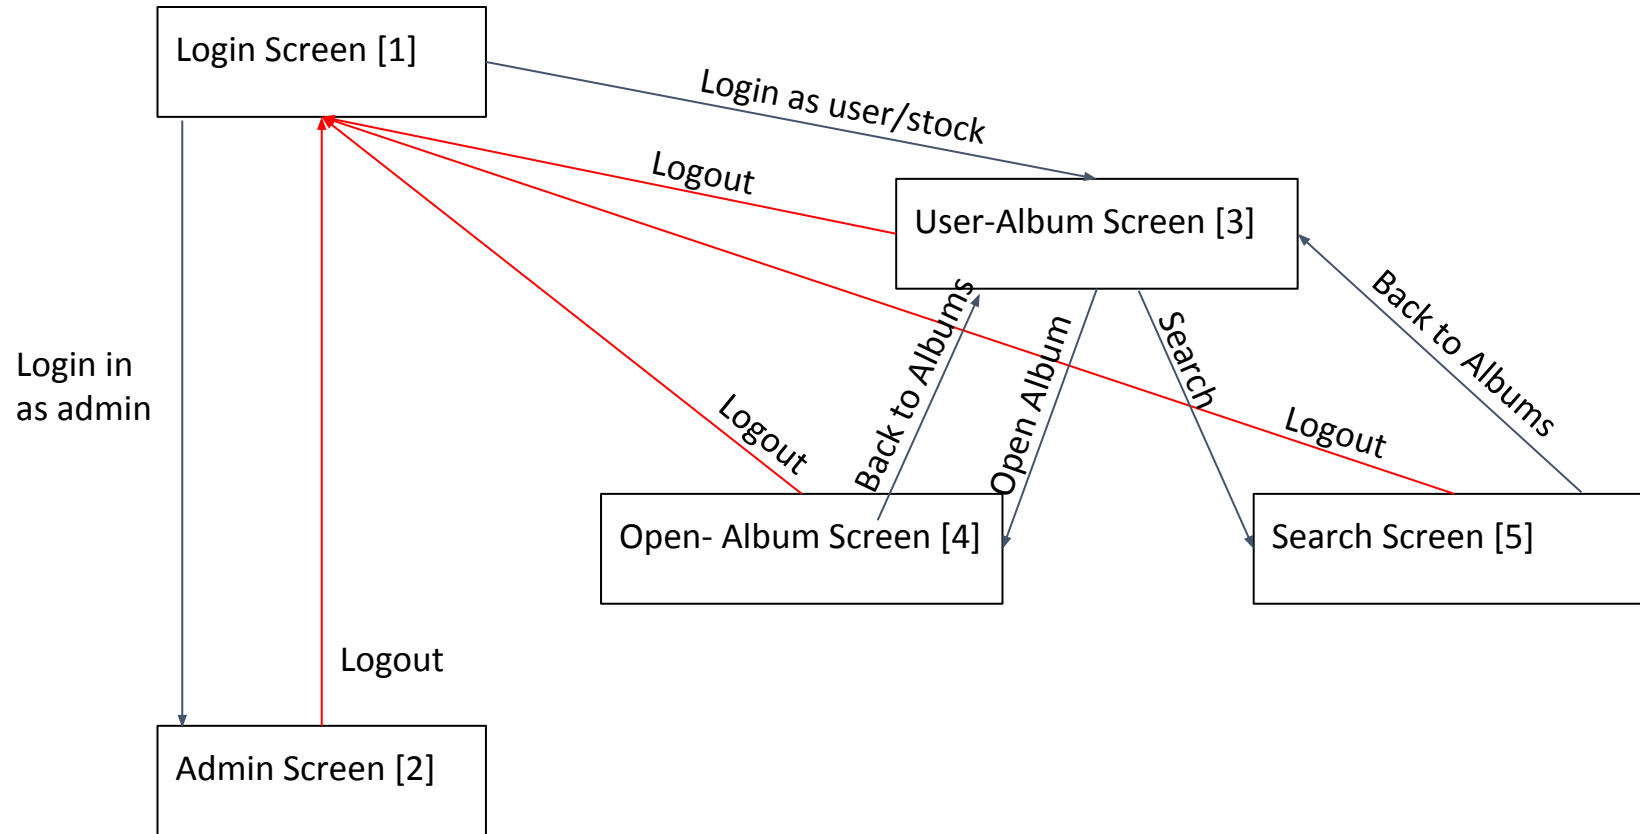

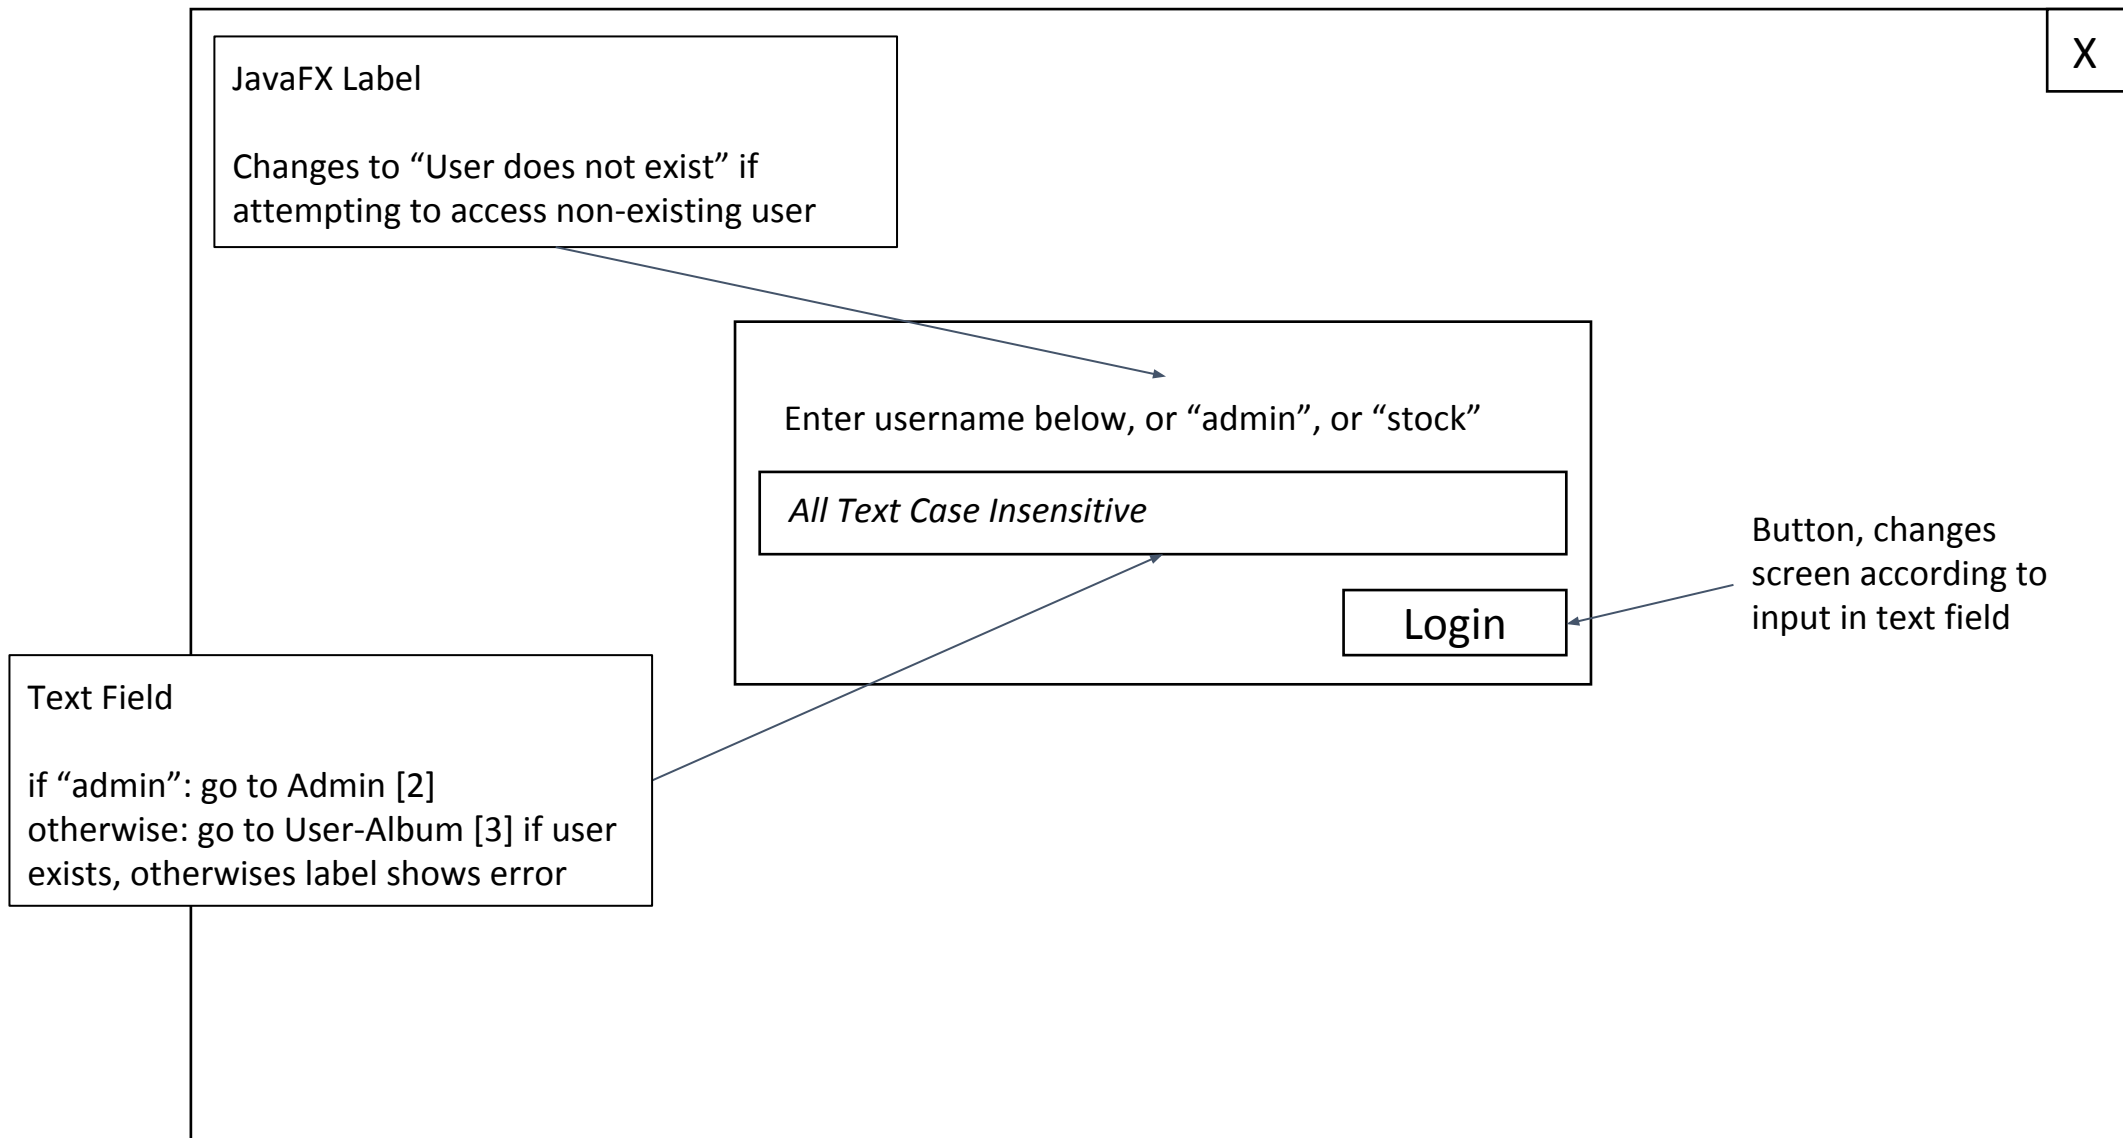

# Photos14

By Thomas Heck and Jake Zhou

# Photos14 Overview

# Login Screen [1]

# Admin Screen [2]

First saves all committed updates, then closes application

Listview

**Users**

**User Info**

*All Text Case Insensitive*

Displays Selected User

Delete

**Add User**

User already exists, text case insensitive

*All Text Case Insensitive*

Add

go to Login [1]

Logout

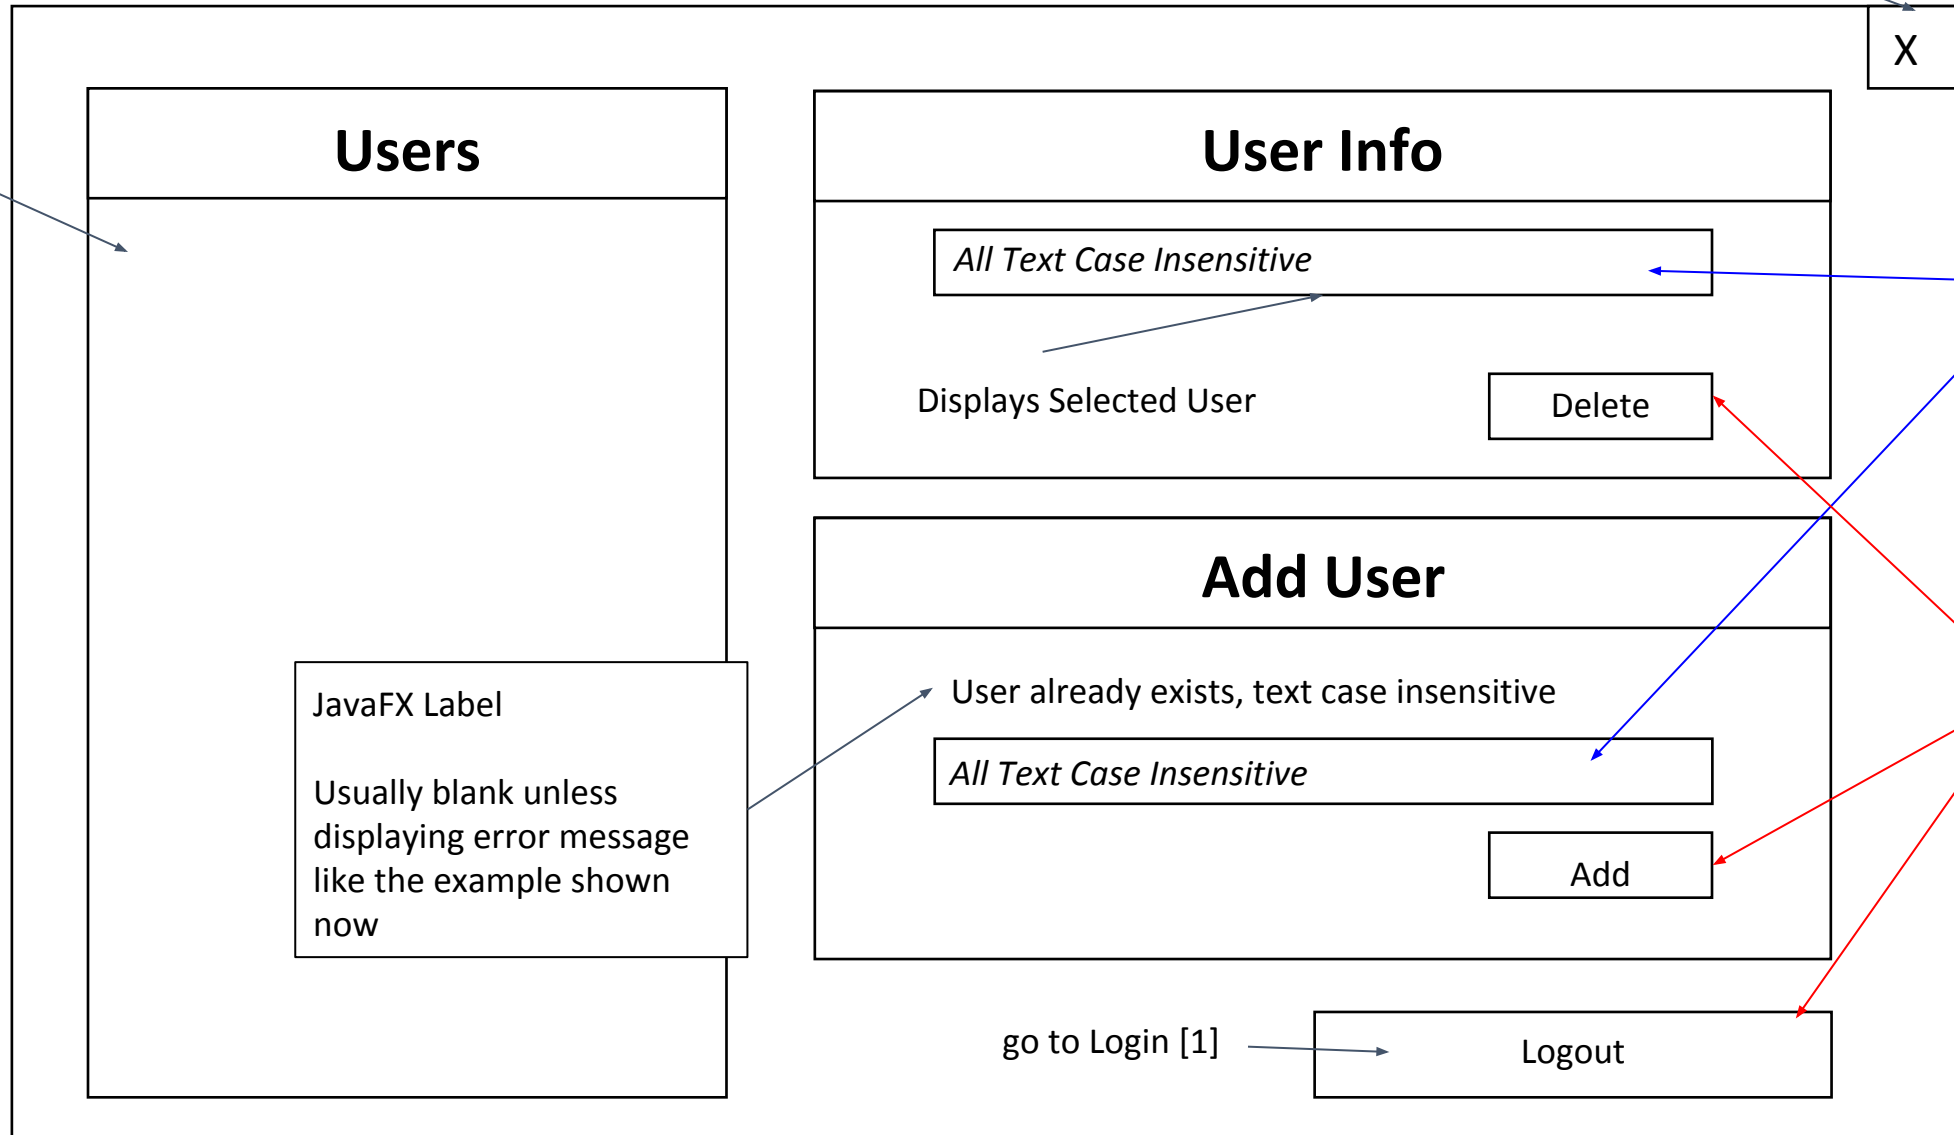

X

Text Field

Button

JavaFX Label

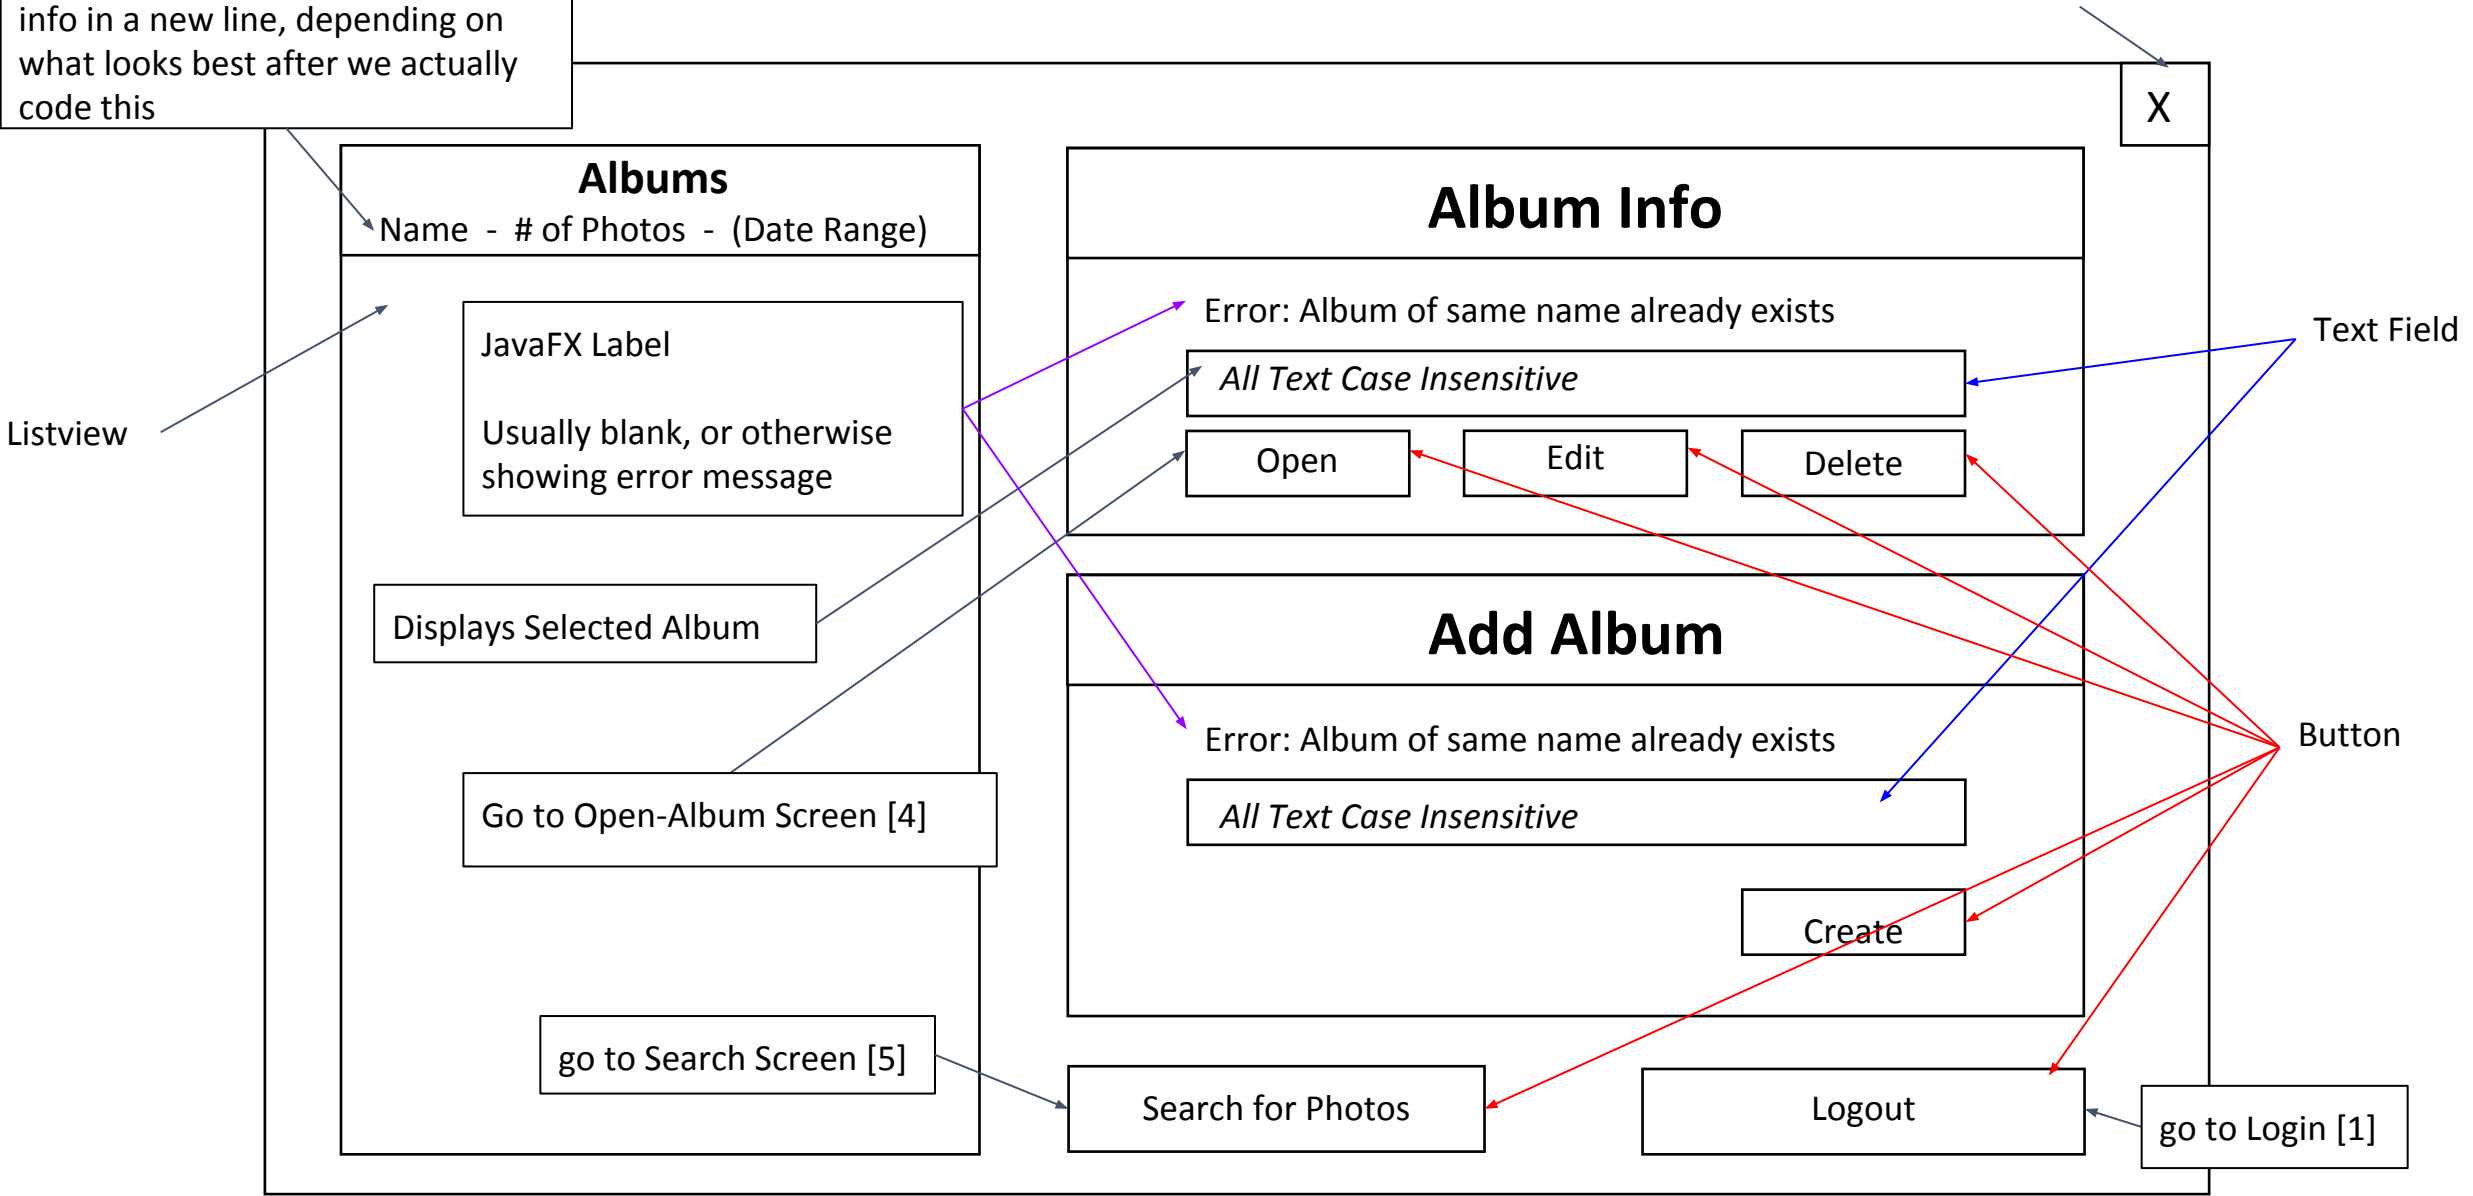

Usually blank unless displaying error message like the example shown now

Note: we are considering displaying this data for each album in either one line or each piece of info in a new line, depending on what looks best after we actually code this

# User-Album Screen [3]

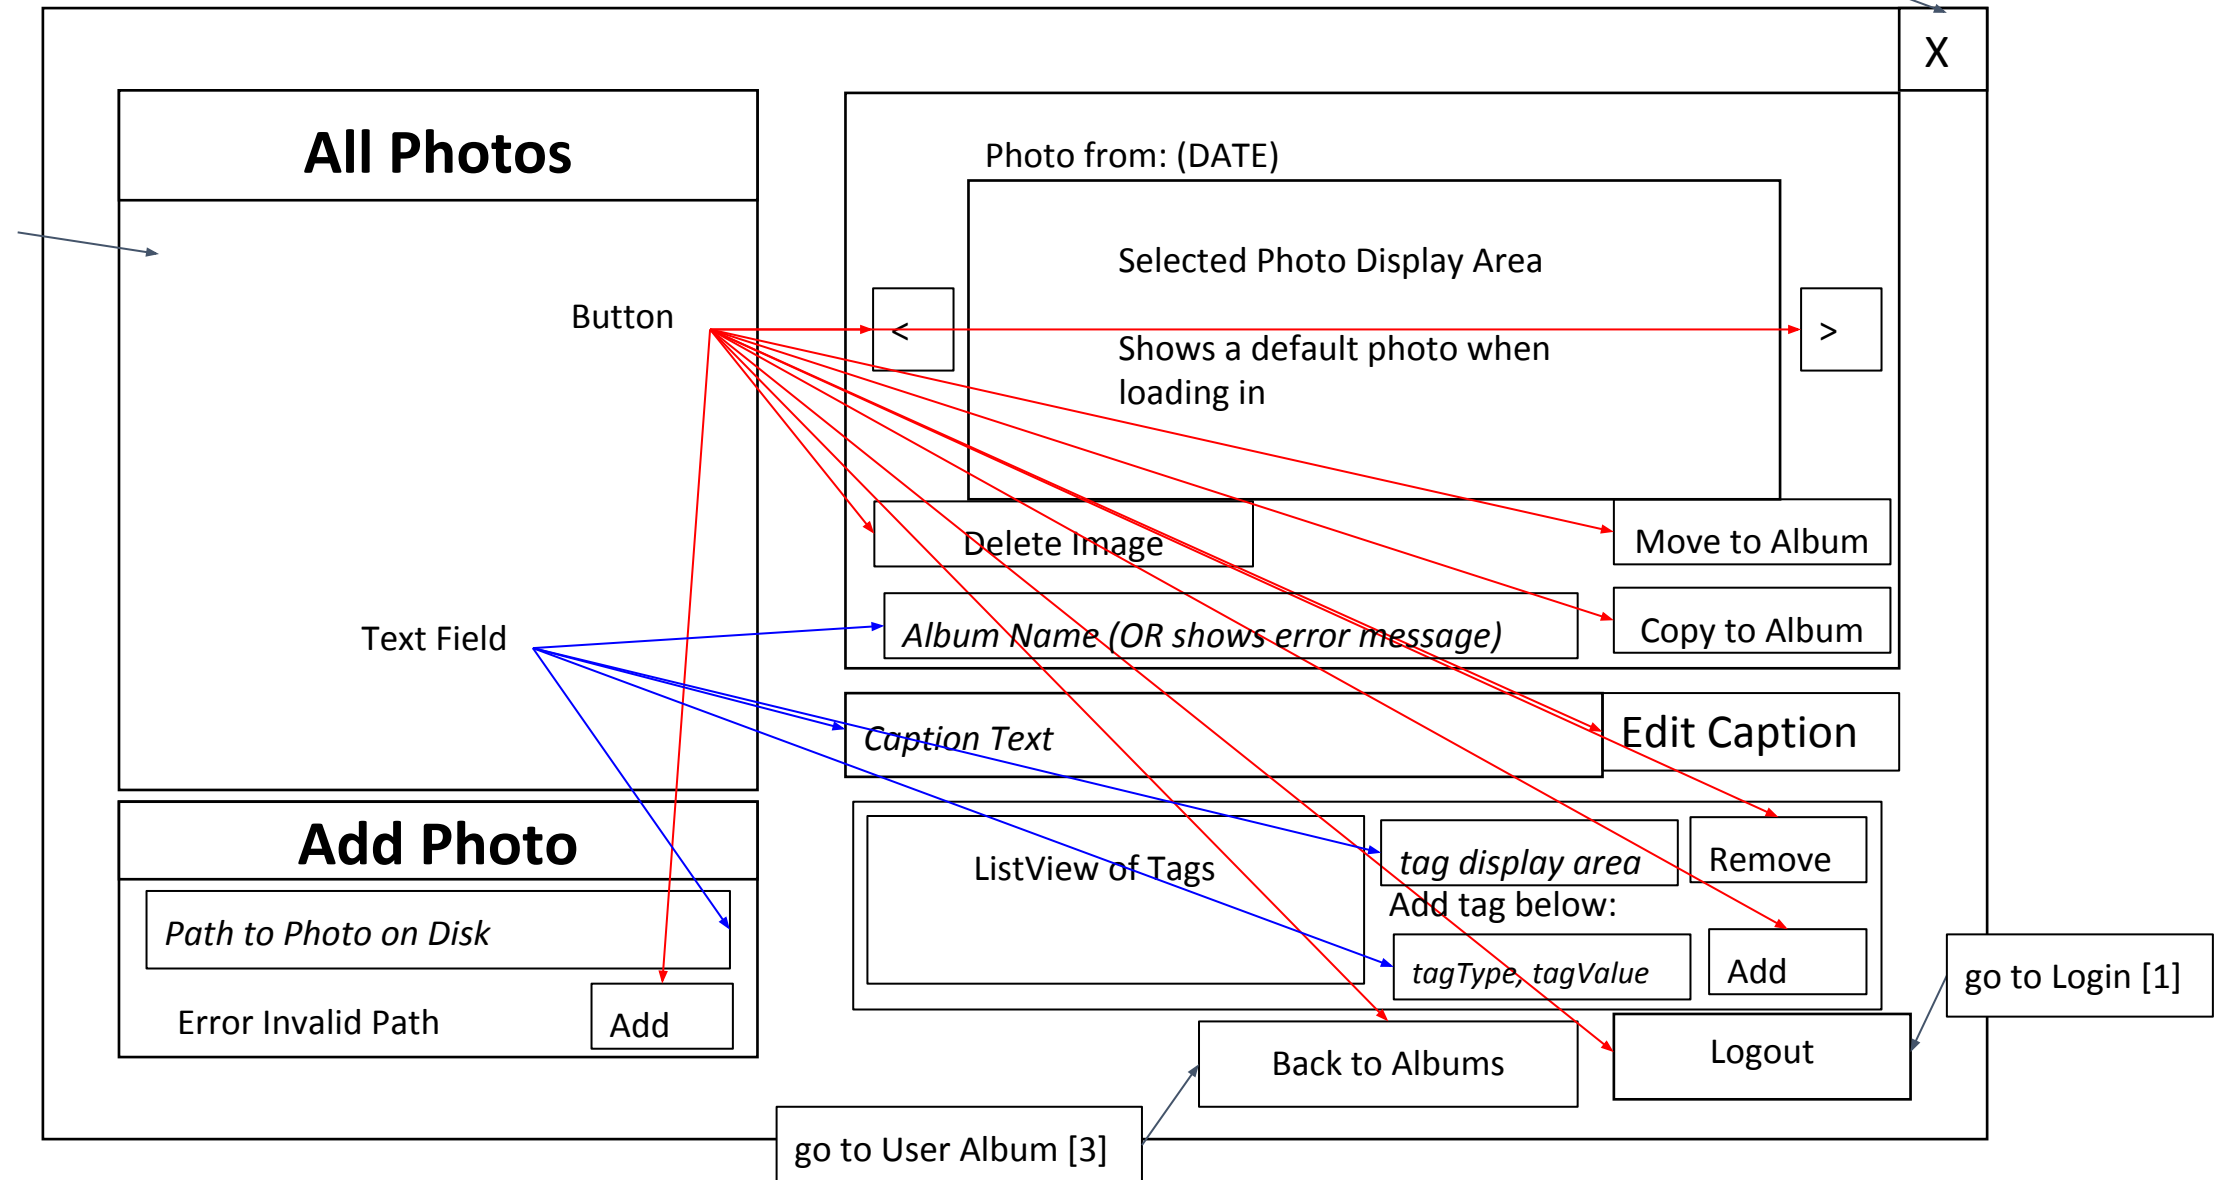

First saves all committed updates, then closes application

# Open-Album Screen [4]

First saves all committed updates, then closes application

JavaFX  
ImageView  
  
Shows  
Thumbnails

# Search Screen [5]

First saves all committed updates, then closes application
